What is in the box?

Electric Air Duster*1

USB Cable*1

Nozzle*5

User Manual*1

Cleaning Brush*3

Specifications

Power Supply	DC 5V
Input	2A
Rated Power	68W
Motor Rotate Speed	110000RPM
Charging Time	3.5-4.5 H
Battery Working Time (Fully charged)	20-30Min
Working Temperature	14°F~122°F(-10°C~50°C)
Storage Temperature	-2°F~140°F(-10°C~60°C)
Noise	<90dB
Material	ABS,PP
Cable Length	31.5 IN
Weight	450-500g
Product Dimensions	160*100*65mm
Battery Capacity	7600MAH

Due to the battery protection design, Do not charge when the machine just finished using, the battery temperature is too high, please wait ten minutes to cool down before charging.

Operate Instruction

1. Long press power button 3 seconds, turn on the duster and speed 1 work.
2. Press power button again, change to speed 2 work.
3. Press power button the third time, change to speed 3 work
4. Press power button the fourth time, change to standby mode.
5. Long press power button to turn it off when it is in turn on status.

How to Charge

1. Insert the USB cable into the charging port of the air duster, and connect to a 5V/2A USB outlet, such as a USB charger, mobile phone adapter, laptop, mobile power supply, etc., in order to shorten the charging time, the 5 V/2 A adapter is the best choice.
2. When the device is charging, the indicator light flashes red, When it is fully charged, the green indicator light is always on.

Note:

1. It is not recommended to use the product while charging, because it will not hold a charge while working.
2. In case that the air duster stops working in a short time, please keep the battery in a fully charged condition. Battery's lifetime would be shortened if you keep it in a wet place.

Indicator Instruction:

1. The red light flashes when charging
2. The green light is always on when full charged.
3. The green light is on when using.

Tips: To shorten the charging time, please connect the cable with a 5V/2A USB outlet, like USB charger, cellphone adapter, etc., Some USB outlets might have insufficient output current, which will slow down the charging speed or even hinder the charging.

How to Use

Note:

When using the Pressurized air for air nozzle for air inflation, the air valve must be opened for rapid air inflation.

As shown below:

Pressurized air

open the valve with the tip of the air nozzle

Release the nozzle from the nozzle hole and put it to the air outlet.
